

Motion Activated Application Switch

Ease your mind with the flip of a switch.

Have you ever forgotten flip a switch to start application of a product?

Have you ever accidentally left the switch on?

- ◆ Reduce your chance of leaving a switch on and burning your crops. This motion-activated switch starts the application of product when your machinery starts moving. Application stops when you stop.
- ◆ This motion-sensor is designed to automatically trigger application of product. It starts electric motors or valves when the planter initiates motion and shuts the system down when motion stops.
- ◆ An override switch allows the operator to turn the system on when stopping to check flow to the rows or check calibration.
- ◆ A status light allows the operator to visually see when the system is in an active state or non-active state.
- ◆ May be used when applying liquid starter with the planter or other planting insecticides and herbicide applications.
- ◆ Safe and easy to operate.
